

505 Transfer Function

Peter Terrio - 2018-03-22 - Comments (0) - Turbine Articles

Customers frequently ask for the transfer function of a 505 control for use in modeling/simulating the full system. Attached to this article are PDFs which detail the transfer function for 505 controls (all models and part numbers) and all 5009FT controls. If additional services or system modeling support is required, please contact commercially authorized OEMs and channel partners.
