## AC Voltage Sensing inputs DTSC-200A /easYgen-100/1000 controls

Clemens - 2025-09-04 - <u>easYgen-800</u>

 $\begin{array}{l} People \ installing \ DTSC-200A \ , \ easYgen-400, \ -600, \ -800, \ -1400, \ -1600 \ , \ -1700 \ \& \ -1800 \ \ controls \ in \ an \ 400, \ 440, \ 480 \ \ VAC \ voltage \ application \ are \ sometimes \ confused \ , \ if \ they \ are \ seeing \ this \ pic \ in \ \ instruction \ manual : \end{array}$ 

×

To be compliant to UL6200 standard, we have to limit Line to Line voltages to maximum 300VAC.

Used voltage sensing connectors have UL up to 300V Line to Line (E-60425-19931013).

If you built a control panel which is not according to UL6200 you can go up to 480VAC Line to Line as described in manuals.
