easYview the mini SCADA system

Simon - 2025-03-04 - easYview

Woodward's first derivate of the easYview product range

×

P/N 8446-1071 ANNUNCIATOR - EASYVIEW-07-030

Standard features:

- visualization of up to four gensets
- customize with your logo
- customize with your boot-up screen
- atvise software license is included with each product

The easYview comes pre-engineered visualization for up to four gensets connected to a mains. The software allows the user to include more easYgen controls and to identify these via a Woodward automatic network check.

×

Based on the very powerful visualization software atvise you can customize the screen to your needs.

Full SCADA customization with atvise software

engineering time savings × leverage on Woodward's pre-engineered software with consistent object orientation in the engineering of data structures and graphic objects × simple intuitive web-visualization engineering tool without Web-Knowledge more clients × the easYview server allows you to embed the visualization into 3rd party SCADA or run it via web-clients on various devices like a central industrial PC or a laptop. Freedom × plenty of room for individualization **Openness** × easy connectivity to other systems through open interfaces

×

Scalable for different screen sizes

Full functionality all developer features can be used in full, without any restrictions
