## easYview the mini SCADA system

Simon - 2025-03-04 - [easYview](#)

### Woodward's first derivate of the easYview product range

P/N 8446-1071  
ANNUNCIATOR - EASYVIEW-07-030

#### Standard features:

- visualization of up to four gensets
- customize with your logo
- customize with your boot-up screen
- atvise software license is included with each product

The easYview comes pre-engineered visualization for up to four gensets connected to a mains. The software allows the user to include more easYgen controls and to identify these via a Woodward automatic network check.

Based on the very powerful visualization software atvise you can customize the screen to your needs.

#### Full SCADA customization with atvise software

#### **engineering time savings**

leverage on Woodward's pre-engineered software with consistent object orientation in the engineering of data structures and graphic objects

#### **simple**

intuitive web-visualization engineering tool without Web-Knowledge

#### **more clients**

the easYview server allows you to embed the visualization into 3rd party SCADA or run it via web-clients on various devices like a central industrial PC or a laptop.

#### **Freedom**

plenty of room for individualization

**Openness**

easy connectivity to other systems through open interfaces

**Scalable**

for different screen sizes

**Full functionality**

all developer features can be used in full, without any restrictions
