IKD-IN-16 and IKD-OUT-16 Modules Upgraded with UL/cUL Listing

2025-04-29 - Simon - Product Release

We are excited to announce that the IKD-IN-16 and IKD-OUT-16 modules have been officially upgraded to include UL/cUL listing in accordance with UL6200 edition 2019 (File E347132). This milestone underscores Woodward's commitment to global compliance and our dedication to providing standardized, high-quality solutions for our customers.

What's New?

As part of this certification process:

- **IKD-IN-16:** Specifications remain unchanged, ensuring seamless integration into existing applications.
- **IKD-OUT-16:** Updated technical specifications have been introduced to meet stringent UL/cUL requirements. And an improved power supply was introduced.

To align with the new certification, we have implemented new part numbers for these modules. The transition to these updated part numbers is now fully in effect, and the previous part numbers are no longer available. This change is designed to have minimal impact on applications, ensuring smooth adoption for our customers.

Supporting Resources

For detailed information, including technical comparisons and updated specifications, please refer to the attached Product Support Statement and product specification documents.

If you have any questions or require further assistance, our team is ready to help. Please don't hesitate to reach out to us.

Thank you for your continued trust in Woodward as your partner in innovation and reliability.
