BACnet Gateway

×

Simon - 2024-10-10 - communication

A ready-made (=pre-configured) Modbus TCP to BACnet IP Slave Gateway: <u>https://eshop.kuhse.de/de/bacnet.html</u>

The ADF hardware itself: https://www.adfweb.com/Home/products/BACnet_ModbusTCP.asp?frompg=nav18_4

Or you could go through the **easYview**, which supports BACnet as well. You'd need to create a BACnet mapping on the easYview software.
