

Can easYgen-3000XT communicate via J1939 with smart Battery Chargers ?

Justin Schneider - 2026-07-27 - [easYgen-3000XT](#)

easYgen-3000XT line is supporting J1939 Battery Chargers with Software 1.12 and higher

Generic J1939 support for Battery Chargers

easYgen receiving now as well J1939 BC charging current and voltage.

Additional Battery Charger states: Idle, charging, stand-by, battery-failure, charge failure, power connection

Battery Charger AC Line States: disconnect, connected, error are available in easYgen's HMI

All those data can be re-used as in LogicsManager

Available now in new easYgen-3000XT Release 1.12

For battery monitoring, you may consider the following two brands:

- **SENS** - [Visit their website](#)
- **ADELSYSTEM** - [Visit their website](#)

However, please note that no liability or responsibility is assumed for the functionality of the connection.
