

First Generation 505 Manual - 85007J

Nicole Chittum (Turbine) - 2018-05-11 - Comments (0) - Turbine Articles

The 505 is Woodward's digital governor for steam turbines. The attached manual is for the first generation 505, made in the mid 1990's. This manual is for single-actuator or dual-actuator steam turbines, not extraction turbines. Due to the age of this product the manual is not available through normal means, like Worldwide View.
