My easYgen-3000XT Display' brightness and contrast not good enough

Justin Schneider - 2026-07-27 - easYgen-3000

If you have problems to read the display after powering up easYgen-3000 control,

press "STOP" button on the front for approximal 10 seconds.

The an auto adjustment mode of the display will be started and the display should get readable afterwards again.
